

Responding to COVID-19 Requires an Integrated Approach

03.27.2020 | UPDATES

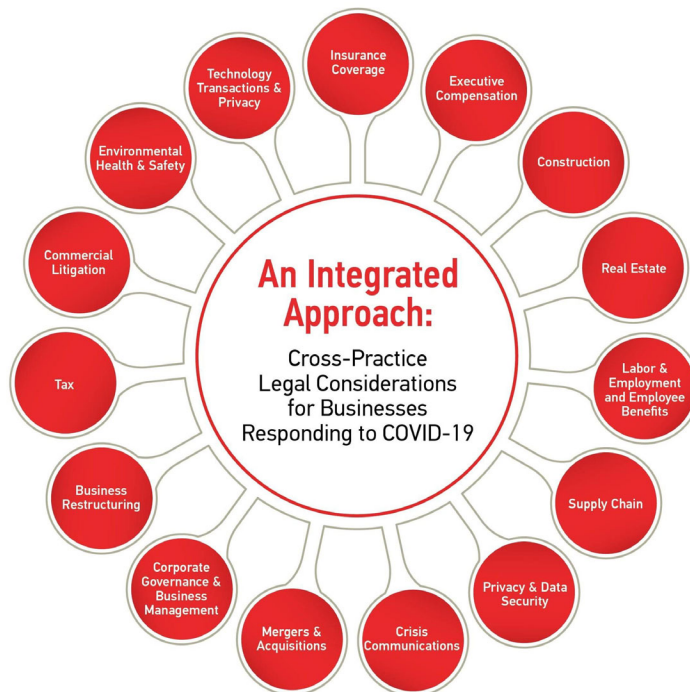

The COVID-19 pandemic's impact on companies touches on several legal areas at once, all of which are rapidly evolving. In response, Perkins Coie created a cross-disciplinary team that collaborates daily with each other and clients to offer the most comprehensive, current guidance.

Recognizing the high volume of COVID-19 content being published, we developed a one-stop, integrated resource page that addresses key legal and business considerations for companies across essential business areas, from insurance coverage and labor and employment, to privacy and security, corporate governance, tax, construction, truth-in-advertising, supply chain, and more. We offer practical guidance, in checklist format, for the most-discussed issues so all businesses, clients or otherwise, can benefit.

As the legal issues created by COVID-19 continue evolving, Perkins Coie has launched a blog to address further business challenges and offer solutions in real time.
